

Reference Sire

Hes Plenty "Doc"

Hes Plenty produced his first colt crop in 2007 and we are very pleased with them. "Doc" as we call him combines the Driftwood bloodline with Poco Bueno, Goldsecker Bars, Skipper W, Doc's Hickory, King P-234, Doc's Prescription and Leo. We feel these ponies will train for any of your needs whether it be cow work, speed, ranch work, roping, etc. His ponies have the conformation, good bone, muscling and athletic moves that we are looking for.

In his training Doc has proven to us he is very strong and a very trainable horse. He trained well and retained what we ask him to do.

You need to see this horse to appreciate why we are excited about the contribution he will make to Lyons Den Quarter Horses.
